SERIES

PXLED - Power Floodlight Series for Hazardous Areas

Explosion-protected LED floodlight series for Zone 1, 2, 21 and 22

EATON

Powering Business Worldwide

Ex-Floodlight PXLED

(Ex-Zone 1, 2, 21 and 22)

Lighting under harsh conditions

The new modular LED floodlight series PXLED is suited for nearly every kind of lighting task in hazardous areas, including applications in On- and Off-shore, heavy industrial, chemical, petrochemical, oil and gas, pharmaceuticals, shipyards, dockyards, power generation, paper mills and wastewater treatment indoor and outdoor with potentially explosive areas under harsh conditions like vibrations, dust, moisture or corrosive atmospheres and extreme temperatures. The PXLED comes with a standard U-shaped mounting bracket for ceiling and wall mounting

Replacement of conventional light fittings up to 600 W

With a luminous flux from 5,000 lm up to 32.000 lm this floodlight series can be used to replace nearly every floodlight with conventional light sources with an equivalent power consumption from 70 W up to 600 W.

High efficient LED technology

High efficient power LED module with 110 Lumen/Watt enables up to 70 % energy-cost savings compared to conventional HID lamp.

Safety first

All PXLED multi-module floodlights from size 10L to 30L are equipped with a multichannel LED driver. This driver provides for each LED-module a separate power channel circuit. Even if one circuit fails, all other LED-modules are still working.

Modular design - just use the size you need

Thanks to the modular design of the PXLED series you can exactly choose the lumen output you need. There is no need to over/underdesign your lighting project. Six sizes are available from nominal 5.000 lm to more than 30.000 lm with a step-wide of 5000 lm.

Easy to install

A stainless steel swivel bracket with adjustable setting angle allows an easy alignment of the floodlight. A fixing screw

secures the alignment. The swivel bracket provides up to five Ø13 mm fixing holes for a safe assembly.

Different mounting accessories enable easy and safe mounting wherever required.

Together with two cable gland a large terminal compartment in Ex-e design allows cost saving through-wiring without additional terminal boxes.

The used Ex-e terminals can clamp up to 6 mm² wiring.

Internal and external PE-terminals allows nearly all cabling technique.

5 YEAR WARRANTY

Features

- High efficiency: up to 110 lm/W
- Operating temperature -50 °C up to +55 °C
- Suitable for Explosion Group IIC / IIIC environment
- Broad range of light output from 5,000 lm up to 32,000 lm
- Wide and narrow beam pattern (asymmetric beam on request)
- Long lifetime
- Ex-e compartment for driver & terminal for easy installation and maintenance

Designed for long lifetime

High ambient temperatures can drive the LED chip-temperature into a not permissible range. This would reduce the life-span of the LEDs tremendously. Eaton provides an enclosure design with large cooling pipes and a innovated heat reduction

design.

Tests done under the worst test conditions have shown that the LED-chip temperature is always below critical values. The designed life span for the LED (L80) is more than 60,000 h even at +55°C ambient temperature

The Eaton-LED driver is especially designed for the harsh conditions of hazardous environments. According to EN 61000-4-5 an electronic device must withstand a surge pulse of 1 kV between L- N, our LED driver is designed to withstand 4 kV between L- N and L, N - PE.

All electronic components with self-heating are over dimensioned to ensure a maximum maintenance-free period. The driver has an own Ex-certification "q" and is mounted within the Ex-e compartment.

In the very unlikely cause of an driver failure this unit can be changed separately from the floodlight.

Light distribution for various applications

Beside the various lumen output packages different light distributions can be realized with the PXLED-series.

A wide beam pattern as well as a narrow beam pattern is realized by the use of special designed lens caps for the LEDs. In addition, asymmetric light distributions are also available for special applications.

With a light transmission factor of more that 90 % we are able to offer a system efficiency of more than 110 lm/W.

The laminated glass version with external plastic foil, either in clear or frosted version, prevents any glass splitters from falling, allowing safe use in critical application such as food & beverage, chemical and pharmaceutical Industries

wide beam lens caps

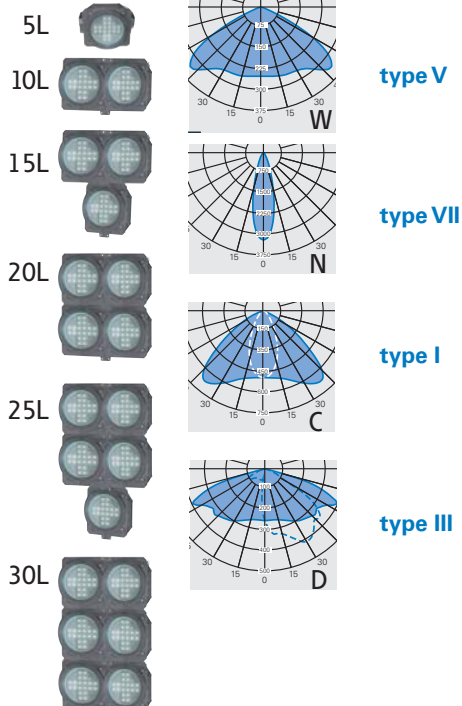

narrow beam lens caps

Champ FMVA

LED FLOODLIGHTING for hazardous areas

Safe. Reliable. Efficient.
9,000 to 15,000 lumens

EATON

Powering Business Worldwide

Design features

Our Champ LED floodlight is a field-proven design that helps ensure safety, reliability and performance in harsh and hazardous rated areas. Champ products are engineered to deliver more operational value and better total cost of ownership.

INSTALLATION EASE

A Light weight & easy access

- Driver and LED engine are field replaceable for extended life even beyond the warranty
- Removable cover for LED engine and hinged driver compartment enables faster installation, access to wiring and field maintenance
- 22% weight reduction from previous generation Champ floodlight models

B Now supports up to 10 AWG wire for easier, less costly retrofits!

- Customers with 10 AWG wire already running through their facility from older, higher power HID fixtures can reuse the same wiring
- Plug and play wiring helps speed installation

C Versatile mounting options

- Yoke mount and accessories help ensure the fixtures are installed in the correct location to properly light your facility

All units come standard with a yoke mount

RELIABLE PERFORMANCE

D Thermal management

- Heat fins help ensure proper air flow and facilitate dust-shedding for effective heat dissipation and thermal management of LED engine and driver

E Performance in extreme environments

- Operating ambient -40°C to 65°C
- Type 4X, IP67
- 6kV surge protection
- Corrosion resistant aluminum housing with Corro-free™ epoxy powder coating
- Vibration tested in accordance with Section 33 of UL844
- Impact tested in accordance with IEC/EN/UL/CSA 60079-0 Section 26.4.2

OPTIMIZED LIGHT & QUALITY

F Custom optics & colors

- Directs light where you need it, helping eliminate gaps and dark spots.
- Can potentially reduce the number of light fixtures required in your application
- 2200K–DEEP WARM, 3000K–WARM, 4000K–NEUTRAL and 5000K–COOL color options available

NEMA 4x4
Narrow uniform
pattern for use at
larger distances

NEMA 7X6
Wide flood
distribution provides
a large and uniform
light pattern

F

5000K – COOL
Crisp, bright white
with a blue hue

3000K – WARM
Soft, warm white
with a yellow hue

G Multiple lens & epoxy powder coat options

- Clear glass lens (standard)
- Diffused glass and clear polycarbonate lenses optional
- Corro-free epoxy powder coat available in gray

G

Specifications

Applications:

- For general area illumination of locations with mounting heights from 15 to 30 feet
- Locations requiring continuous and consistent light levels where extremely corrosive, wet, dusty, hot and/or cold conditions exist
- IP67, Type 4X, marine, wet locations and hose-down environments
- Oil and gas refineries, drilling rigs, petrochemical facilities, food and beverage facilities, platforms, loading docks, tunnels

†Consult IES files for exact performance data.

LED system:

- High intensity discrete power emitters
 - Standard: cool white (5000K, 70 CRI);
 - Available options: deep warm (2200K, 70 CRI), warm white (3000K, 80 CRI) or neutral white (4000K, 80 CRI)
 - Dimmable driver, 0-10v
- NEMA 7x6 or 4x4 optical patterns available
 - Rated life of 60,000 hours continuous operation at 55°C operating ambient temperature
 - 5 year fixture warranty*

*Refer to [terms & conditions](#) on Eaton.com for Crouse-Hinds series solutions.

Standard materials:

- Lamp housing - die cast aluminum with Corro-free™ epoxy powder coat
- Lens - heat and impact-resistant glass or polycarbonate
- Gaskets - silicone
- External hardware - 316 stainless steel
- Factory-sealed, no external seals required

Powering Business Worldwide

LED lighting for hazardous areas
Zone 1,2,21 and 22

CROUSE-HINDS
SERIES

HFL LED floodlights for hazardous areas

Safe. Reliable. Efficient.

Featuring the industry's broadest range of LED luminaires for harsh and hazardous environments, Eaton's Crouse-Hinds can deliver a lighting solution that performs reliably in even the worst operating conditions. All the while reducing your energy, maintenance and manpower costs.

Why LED?

Useful life

Rated life of 50,000 hours of maintenance-free and safe operation

Energy efficiency LED

Average energy consumption is 65% less than HID and 90% less than incandescent

Start/restart time

Instant illumination compared to 10 minute restrike time for HID

Light quality

Higher color rendering and color temperature compared to fluorescent

Environmental benefits

Mercury-free LED eliminates disposal costs and lower energy consumption for a smaller carbon footprint

Why Crouse-Hinds?

Industry-best reliability

Built to withstand extreme temperatures, vibration, water and dust

Thermal management

Effective heat sinking ensures longer life

Quality of light

Custom optics designed to maximize light distribution and intensity

Design features

High Efficiency and Energy Saving

- Up to 140lm/w lumen efficacy

High-Quality Enclosure Materials

- C5-M rated corrosion
- IK10

Outstanding Optical Performance

- Multiple beam angles with optimal light distribution
- Various color temperature
- Great intensity uniformity to avoid uneven light

Frosted lens option to reduce glare

- Tempered clear glass standard
- Diffused glass lens optional

Strong Water Ingress protection

- IP66 under 5G vibration

Reliable Environmental Adaptability

- Wide temperature range
- Corrosion resistance
- Vibration and impact resistance
- Wind load
- Wet location

Surge protection

- Standard 6kV surge protection; optional 10kV available

Convenient Installation and Maintenance

- Smart bracket mounting size design

Easy-to-Maintain Design

- Replaceable LED module, driver and key components

Why choose HFL LED lighting?

Reliable floodlights. HFL LED luminaires are engineered to deliver high lumen output and maintenance-free long life in the toughest conditions.

HFL 20L vs 400 watt HID

Assumptions: Calculations based on overall life of the LED system. Energy cost of \$.09 per kilowatt; 24 hour per day operation; labor rate of \$75 each for 2 workers; average time for fixture maintenance of 1 hour.

HFL LED floodlights for hazardous areas

HFL LED luminaires

The HFL series is a harsh and hazardous area floodlight for use in Zone 1,2,21 and 22 areas designed to provide up to 40L with outstanding lumen efficacy and easy installation. Compared with traditional HID floodlights, the HFL features high efficacy and long life at high ambient temperatures combined with a robust marine grade housing to reduce the total cost of ownership.

Four versions of the HFL and a variety of optics are available catering for a wide range of applications and a high installed efficacy.

Model	Nominal lumens*	Wattage*	Equivalent HID luminaire	Energy savings
HFL-12L	12556	89W	250W	Up to 64%
HFL-20L	19319	133W	250-400W	Up to 65%
HFL-30L	31541	220W	400-600W	Up to 63%
HFL-40L	37215	260W	600-1000W	Up to 74%

* Tolerance+/- 10%, nominal lumen data for 5700K, clear glass, wide beam angle

Applications

- Locations requiring continuous and consistent light levels in extreme ambient temperatures
- Areas requiring frequent switching of lights
- Where extremely corrosive, wet, dusty, hot and/or cold conditions exist
- Oil and gas refineries, drilling rigs, petrochemical facilities, food and beverage facilities, platforms, loading docks, tunnels, outdoor wall and stanchion mounted general area lighting, and where flammable vapors, gases, ignitable dusts, fibers or flyings are present.

Certification and compliance

- Marking accd.to IECEx:
Ex db eb mb IIC T4...T3 Gb
Ex eb mb IIC T4...T3 Gb
Ex tb IIIC T80°C/ T85°C Db
- Marking accd.to 2014/34/EU:
II 2 G Ex db eb mb IIC T4...T3 Gb,
II 2 G Ex eb mb IIC T4...T3 Gb
II 2 D Ex tb IIIC T80°C/T85°C Db
- Certificate No.
IECEX NEP 24.0045X
SGSNA25ATEX031301X
IECEX NEP 25.0009X

Standard Materials

- Enclosure: copper-free aluminum with C5-M coating
- Lens: tempered and impact resistant glass lens
- Gaskets: silicon
- Guard: standard without guard but SS316L guard is available as option
- Bracket: galvanized steel and SS316L available

Key features

- Instant on and cold temperature operation/no warm-up requirement
- Ambient temperature: -40°C to +55°C
- IP66
- Anti-vibration DNV 2-4
- IK10 enclosure

LED system

- Lumen efficacy up to 140lm/w to save more energy
- 5700K, CRI 70 & 3000K CRI80 as standard (4000K and 5000K optional)
- Type V: 120° wide beam and 30° narrow beam
- Asymmetric Type II option
- Asymmetric Type IV option
- Foggy diffuser with harmful glare protection
- L70: 120,000h@25°C
- L70: 50,000h@55°C
